

OPEN·XCHANGE® APPLIANCE EDITION

keep in touch OPEN·XCHANGE®

Collaboration - The road to business success

Open-Xchange Appliance Edition provides the basis for efficient teamwork with proven tools that are used worldwide by over 8 million users.

E-Mail – The fundamental form of communication that no organization can live without.

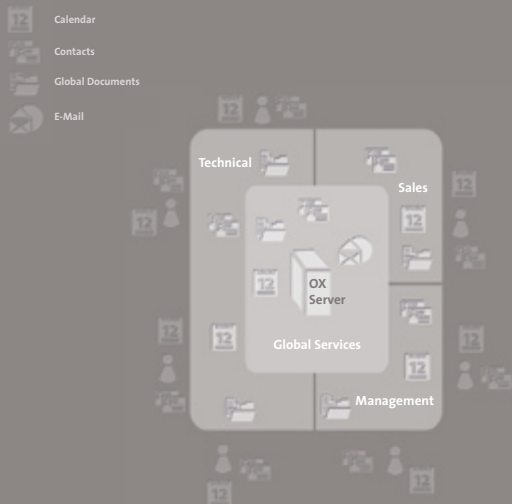

Contacts – A centralized contact list that can be selectively shared by applications and users saves time, reduces confusion and eliminates duplicates.

Calendar – Calendars that can be shared by users to increase teaming and provide a view into personnel activity without violating privacy policies.

Document sharing, storage & management – The centralization of documents is the key to teamwork. Combined with version control, an organization can work from a united document repository that is always up to date.

Tasks – Sharing and assignment of tasks within a team opens up visibility into progress against objectives. This leads to better accountability, goal management and deadline control.

Having these capabilities individually can help, but when they work together they will provide a true collaboration solution that will substantially increase organizational efficiency. Open-Xchange takes this concept one stage further by bringing these components together and uniting them into one cohesive, efficient and integrated package that provides organizations with complete Smart Collaboration™.

Key Functions Infrastructure

- Server Operating System
Univention Corporate Server 2.1
- Apache Webserver
- MySQL Database
- Anti-Virus
- Anti-Spam
- Backup (Snapshot/Recovery)
- Easy, menu-driven Installation
- Identity Management
- Infrastructure Management
- Import of CSV, iCal, and vCard files
- WebDAV interface

Key Functions Groupware

- E-Mail
- Team Calendaring
- Team View
- Free / Busy View
- Contact Management
- Task Lists
- Document Storage
- Document Management
- Centralized Bookmarks
- Centralized Knowledge base
- Collaboration Portal
- "Mashup" capabilities to integrate web applications
- Web Based Client (AJAX)
- Microsoft Outlook® Connectivity

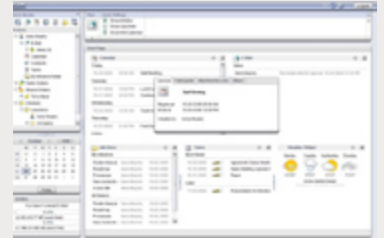

Open-Xchange Value Package

- Update Service (Product and Operating System updates)
- Upgrade Assurance to future versions
- User Manual
- Administration Manual
- Online Help
- Support Database Access
- User Forum Access

Advantages of Open-Xchange Appliance Edition

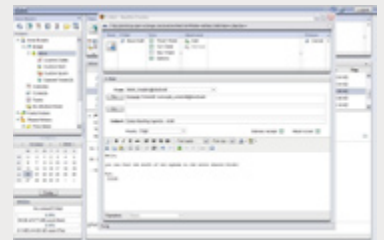

Benefits for Executives

- No New Training Requirements
- Only a Single Software Package Required
- No Hidden Software Costs
- Low Maintenance Requirements
- Future-Proof Upgrade Assurance
- Support Contracts Available

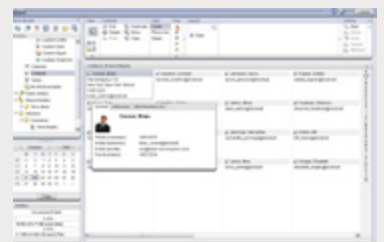

Benefits for Administrators

- Fully Self-Contained Installation of Operating System and Groupware application
- Available for installation on a dedicated server or as virtual image for VMware
- Support of XEN virtual environments
- No Linux Know-How Required
- Web Based Administration
- Built in Anti-Virus & Anti-Spam
- Web Client UI by Default
- Certified Updates and Patches
- Document Linking - Bandwidth Economy

Benefits for Users

- Outstanding Web UI Performance
- Familiar & Easy to Use UI
- Drag & Drop, Right Mouse Button Menus
- Anywhere Access (Web Client)
- Self-Administration
- Centralized and Managed Document Store
- Microsoft Outlook Connectivity
- Portal Overview
- Centralization:
Contacts, Knowledge and Bookmarks
- Powerful linking of inter-component elements

The Open-Xchange Promise

Open-Xchange understands that collaboration is a mission-critical application and that your success, security and peace of mind are the foundation of our business. Hence, Open-Xchange Appliance Edition is much more than just a software product; it comes with certified maintenance and support offerings to ensure that our customers and users are successful long-term. We promise to provide your enterprise with the best possible collaboration solution built on robust, scalable and maintained components.

Open-Xchange Appliance Edition Overview

Open-Xchange Appliance Edition is the latest addition to the Open-Xchange product line. It is specifically designed for small- and mid-sized organizations that have a requirement to keep IT in-house while keeping expenditures in technical staff and expertise to a minimum. This requirement means that installation, administration, maintenance and support have to be simple, fast and efficient: a real “Out-of-the-Box” solution. Open-Xchange Appliance Edition provides the following advanced features:

Advanced web-based end user interface – After installation, users are by default presented with an advanced web-based user interface. Using just a standard browser, the interface features drag-and-drop, right-click commands, context-driven menus and icons, dynamic graphics and easy to understand commands -- features that rival any product on the market.

Global accessibility – Any authorized user from any computer around the world with an Internet browser can access their e-mails, calendars, contacts, documents, tasks, etc. at the click of a button.

Microsoft Outlook® Integration – The product comes with the Open-Xchange OXtender for Microsoft Outlook®, the Open-Xchange Appliance Edition server can connect, service and synchronize Microsoft Outlook®.

Document storage and management built-in – The key to Smart Collaboration is the ability to have all your data accessible in one place via one password and based on a common set of tools. The InfoStore (document and information sharing system) enables organizations to combine the power of e-mail with document version control. Using a Wiki-like, roll-forward/roll-back feature, the entire enterprise can share and manage documents, bookmarks and knowledge entries. The InfoStore also exposes its WebDAV interface enabling full external integration.

System Requirements Client:

Browser

For the client interface as well as the administration interface.

Internet Explorer 7, Firefox (2.+), SeaMonkey (1.+), Safari 3.1
Cookies and JavaScript must be active
