

OPEN·XCHANGE[®] SERVER EDITION

keep in touch OPEN·XCHANGE[®]

All information available at a glance – anytime, anywhere

Enables efficient teamwork

The Open-Xchange groupware provides the basis for efficient teamwork. It combines E-mail, appointment, contact and task management with intelligent document management. With the intelligent teamwork features of Open-Xchange you will save time, money and nerves and eliminate unnecessary sources of error. No more misunderstandings, outdated contact information and schedule conflicts. Open-Xchange significantly reduces the number of unnecessary E-mails and the quantity of locally-stored data and documents - and helps ensure fast and smooth business operations.

Easy to integrate

With Open-Xchange Server Edition, you can continue using a Linux-based E-mail server infrastructure without migration. Or, you can replace Microsoft Exchange Server and enable users to continue with Microsoft Outlook, if preferred.

Scalability guaranteed

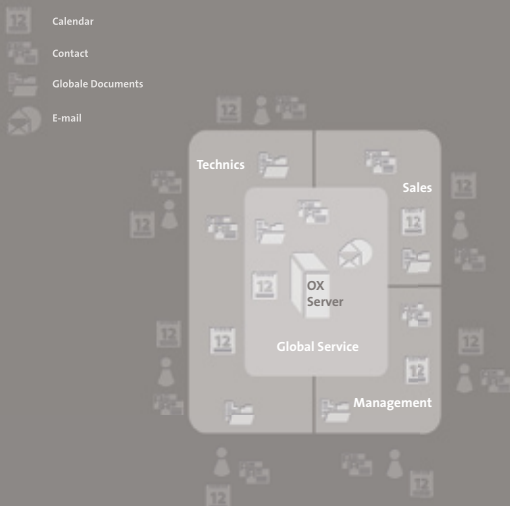

Open-Xchange Server Edition uses the proven code base of Open-Xchange Hosting Edition, which is used by more than 15 million users as software-as-a-service at 1&1 Internet, Network Solutions, Dotster and numerous other vendors. Open-Xchange supports multi-tenants and is suitable for installation in multiple locations.

Flexible to extend

With Open-Xchange Server Edition open and standardized interfaces, you can expand, for example, with telephony, fax, presence and instant messaging services, or attach to CRM and ERP systems.

Individual Services

E-mail and groupware are mission-critical applications. A network of qualified partners can help you plan, implement, and run your Open-Xchange solution, if desired. Our support services make sure that your employees and customers have access to all relevant information and documents – 24/7, 365 days a year.

Features

- E-mail
- Team Calendaring
- Personal and Team View
- Free / Busy View
- Contact Management
- Task Lists
- Document Storage
- Document Management

Advantages of Open-Xchange Server Edition

Benefits for Executives

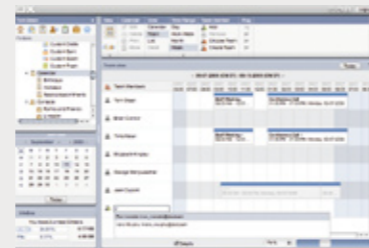

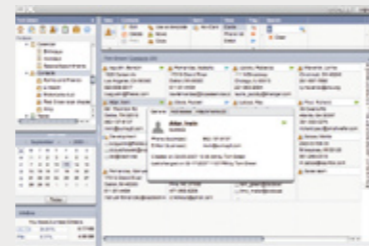

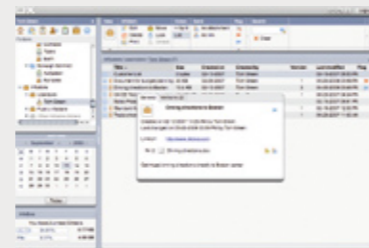

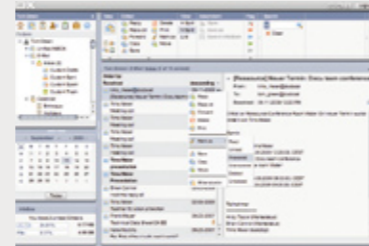

- No New Training Requirements
- No Hidden Software Costs
- Future-Proof Upgrade Assurance
- Partner and manufacturer support available including SLA

Benefits for Administrators

- Optimally-matched software (Operating System and Groupware application)
- Supports standardized Enterprise Linux distributions (Debian, Red Hat Enterprise Linux, SUSE Linux Enterprise Server) and their services (e. g. MySQL)
- Maintenance-free web client user interface by default.
- Certified Updates and Patches
- Integration into existing complex infrastructure via standard APIs
- Existing Linux-based E-mail services can be integrated through standard interfaces

Benefits for Users

- All E-mails, contacts and tasks in one place
- Centralized document store with version control
- Individual permissions
- Internet access is sufficient and all information is available anytime, anywhere
- Universal access using PC, laptop, smartphone
- Integration of external E-mail accounts (e. g. from Google, Yahoo, GMX)
- Synchronization of contacts with external services such as LinkedIn, Facebook and XING
- Publishing of contact folders or files for collaboration with external users (e.g. to share presentations with external users)
- Subscribe to additional information sources (e.g. contact folders or directories)
- One central password for all applications

Do your work where you want – and use your favorite tools and devices

Open-Xchange Server Edition ships with a number of tools that make your business more effective:

Microsoft Outlook® Integration – The OXTender for Outlook® synchronizes calendar, address book, tasks and folders with Microsoft Outlook®. Thus, Outlook® can continue to be used – even if MS Exchange® is detached.

Connection to Mac OS X – With OXTender for MacOS X, users can access and edit all information and documents stored on the Open-Xchange Server in their familiar native Mac applications – Mail, iCal and Address Book.

In addition, all mobile devices connected to the Mac – like iPhones, iPods and cell phones from other manufacturers – as well as software from third-party ISVs that support iSync, get all Open-Xchange data.

Access with Mobile Devices – OXTender for Mobile Web offers online access to appointments, contacts and tasks on the road using a smart phone. OXTender for Mobile Web provides users with a special web client (e.g. for Apple iPhone), providing end users with instant access to their data.

Access with Mozilla Thunderbird

A special extension, developed in the Open-Xchange community: The “Community OXTender for Thunderbird” provides synchronization of calendar and contact data between Open-Xchange Server and Thunderbird. As E-mails are also transferred, this makes Mozilla Thunderbird a free, full-fledged and technically matured client for Windows, Linux, Mac OS X, BSD and Solaris.

System Requirements Client:

Browser

For the client interface, as well as the administration interface:

Internet Explorer 7,
Internet Explorer 8, Firefox (2.+),
SeaMonkey (1.+), Safari 3.1, Google
Chrome, Cookies and JavaScript
must be active

Microsoft Outlook®

Enables offline access to E-mail, calendar, tasks, and contacts folders. Any changes that are made using Microsoft Outlook® offline will be automatically synchronized the next time you go online.

Microsoft Outlook® 2003
Microsoft Outlook® 2007

E-Mail Client

To receive E-mails only (E-mail client):

Microsoft Outlook®/ Express® 97,
2000, XP®, 2003 und 2007
Thunderbird
Evolution

To keep you on the go always „up to date“

The „Open-Xchange OXTender for Business Mobility“ software connector makes employees even more productive. New E-mails, appointments, contacts and tasks will be automatically sent to their mobile device - while that data is safely stored on the Open-Xchange Server. The solution provides native support for a comprehensive list of smartphones, including Windows Mobile (from version 6), Symbian phones and Apple iPhone. In addition, third-party clients enable Blackberry and other devices to benefit from Open-Xchange’s ActiveSync implementation.

The Open-Xchange Promise

Open-Xchange understands that E-mail and groupware are key factors for the success of your business. Therefore, we are using only proven and tested components to build Open-Xchange Server and guarantee you long-term maintenance of the complete solution. When needed, you will receive direct support from Open-Xchange or specially trained and certified partners. This ensures that your employees and customers have around-the-clock access 365 days a year to E-mail, contacts, appointments and documents - and you can concentrate on your core business.
