## Complete and cost-effective

Open-Xchange Advanced Server Edition is preconfigured and ready-to-use groupware for professional users seeking a solution that ships with an integrated operating system, significantly reducing the administrative effort with an integrated graphical administration interface. Open-Xchange Advanced Server Edition is scalable and ideal for organizations with multiple locations.

### Enterprise Linux System included

The product offering includes Univention Corporate Server.

### Groupware and Management Platform in One Place

Open-Xchange Advanced Server Edition enables a simple and centralized graphical administration of users, groups, e-mail and groupware servers.

### Active Directory Integration

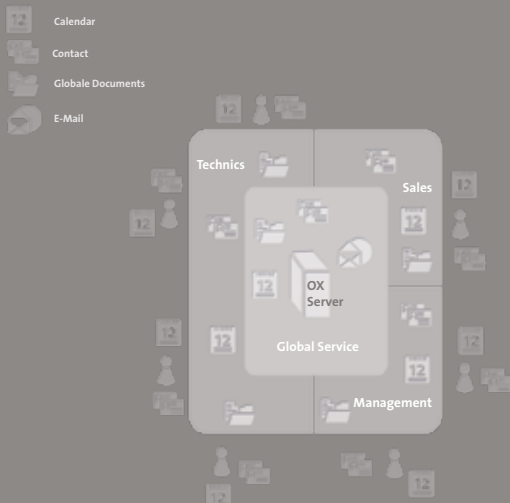

Where others work in two separate directory services, you will manage users, groups and servers in a central interface.

### Integrated Identity Management System

For secure administration of users, identities and authorizations.

### Ideal for 10 to 1,000 users

Available as a Single Server for small companies and Multi Server for organizations with distributed locations.

## Key Functions Univention Corporate Server

## 50 % Discount for the Administrator

Open-Xchange Advanced Server Edition is aimed at midsize businesses, educational institutions and public administrations that want to use a modern and future-proof communications solution based on the operating system platform, Unix/Windows Corporate Server (UCS). The integration of groupware and operating system lowers user administration significantly as users, groups, resources are managed in a central directory service with the graphical administration interface of UCS.

## Free choice on the client access software

Open-Xchange Advanced Server Edition ships with a number of tools that make your business more effective:

**Microsoft Outlook® Integration** – The OXtender 2 for Outlook synchronizes calendar, address book, tasks and folders with Microsoft Outlook. Thus, Outlook can continue to be used – even if Microsoft Exchange is detached.

**Connection to Mac OS X** – With OXtender for MacOS X, users can access and edit all information and documents stored on the Open-Xchange Server in their familiar native Mac applications – Mail, iCal and Address Book. In addition, all mobile devices connected to the Mac – like iPhones, iPads and cell phones from other manufacturers – as well as software from third-party ISVs that support iSync, get all Open-Xchange data.

**Access with mobile devices** – OXtender for Business Mobility offers push synchronization for appointments, contacts and tasks – without installing additional software on your smart phone. The cost-efficient and hardware-independent software solution contains the following components:

- Server-side support of Microsoft Exchange Active Sync (EAS) protocol
- Implementation as a server module within Open-Xchange Advanced Server Edition, which directly connects to the native clients of smart phones using Windows Mobile, Symbian or the iPhone.

## System Requirements Client:

### Browser

**For the client interface as well as the administration interface:**

Internet Explorer 7 und 8 ,  
Firefox (2.+), Google Chrome,  
SeaMonkey (1.+), Safari 3.1,  
Cookies and JavaScript must be active.

Microsoft Outlook®/ Express® 97,  
2000, XP®, 2003, 2007 and 2010  
Thunderbird  
Evolution

## Webmail For Free

Non-profit organizations and large educational institutions often do not have the money to offer their users first-class webmail services. Now, Open-Xchange provides its AJAX-based webmail user interface for free. Plus, non-profits and educational institutions can make available to their users additional features and inexpensive collaboration. Please note that buying groupware user licenses is not a prerequisite for participation in the Webmail For Free initiative.

## Your Kick-start to efficient Teamwork

Open-Xchange Advanced Server Edition provides the basis for effective teamwork. It combines e-mail, calendaring, contacts and task management with intelligent document management. With the intelligent teamwork features of Open-Xchange you will save time, money and eliminate errors. No more misunderstandings, outdated contact information and schedule conflicts. Open-Xchange significantly reduces the number of unnecessary e-mails and the quantity of locally-stored data and documents - and thus ensures fast and smooth business operations.

## The Open-Xchange Promise

Open-Xchange understands that collaboration is a mission-critical application and that your success, security and peace of mind are key to our business. Open-Xchange Advanced Server Edition is much more than just a software product; it comes with certified maintenance and support offerings to ensure that our customers and users are successful long-term. We promise to provide your enterprise with the best possible collaboration solution built on robust, scalable and maintained components.
